Report

A lecture-cum-presentation on ‘Safe Handling of Glassware in Laboratory’ was organized on 9th January, 2018. Mr. Uma Shankar currently serving as the Sales Manager, BOROSIL (the laboratory glassware and equipment manufacturer) was invited for the event. Mr. Umashankar is an ex-professor of chemistry at Wilson College, Mumbai. He began the presentation with a basic introduction of the glassware commonly used in the laboratory. Thereafter, he focused on the different types of glass based on their properties, the process of manufacturing Borosilicate glass, calibration of glassware, pipetting and titration techniques & cleaning and drying of glassware. At the end of the presentation, he also discussed the various “Do's and Dont's” for safely working in the laboratory. To generate interest amongst the students, a documentary was also screened wherein the manufacturing of round bottom flasks by manual blowing was shown.

The program was followed by an interactive session between the students and speaker where the manufacturing of different types of laboratory glasses and safety guidelines were discussed.

69 students of B.Sc (H) Zoology and B.Sc (P) Life Sciences attended the presentation.
