

On 5th September 2018, students of the Mathematics Department undertook the initiative to make the occasion of Teacher's Day a memorable one for the teachers of our department.

The celebrations were held in Room 421. The celebrations started with Shayari by Krishna, who is a first-year student. Teachers were also given funny titles by the students. The celebrations became more entertaining when students showcased their love and respect for their teachers by singing old film songs from the 90's.

Some of the students also shared their classroom experiences. The teachers gave some motivational lectures, recited poems and blessed the students. In the end a cake was cut by the teachers and relished by all of us.
